

Welcome to the state of the art ...

DHE..SL electronic comfort
electronic instantaneous water heater

Be a winner with the new DHE .. SL

Welcome in every bathroom

The new DHE..SL electronic comfort fully electronic instantaneous water heater from STIEBEL ELTRON is a real shower star for your bathroom, because its wide range of functions ensures that it has the perfect program for everybody. It keeps the water temperature precisely to the set level to ensure that the water does not suddenly go cold or very hot.

It also offers every conceivable convenience, such as a range of wellness shower programs, and can also be programmed to suit individual needs. Its softline design means that it will not appear out of place in any room. And because the shower star also saves water, energy and therefore cash, you can recommend it to all your customers with a very clear conscience.

The elegant softline design of the new DHE..SL meets the highest aesthetic demands and will fit into any bathroom perfectly.

All the positives:

- Water at the perfect temperature at all times
- Two temperature settings can be programmed
- Water does not suddenly go cold
- Four wellness shower programs
- High performance yet very compact
- Elegant softline design
- Maximum operating convenience with multifunction display and ergonomic soft-touch keys
- Display to control the flow rate, water consumption, energy consumption or simply the time
- Environment-friendly ECO function saves energy and water
- Precise temperature settings, infinitely adjustable from 20-60°C
- Child lock with temperature limit
- Radio or cable remote control also available as an option

Perfect comfort – once set, the DHE will supply water at your perfect temperature

Temperature display
Background light
Bar display for power
2nd display for example flow rate

You can switch one of these deluxe functions on and off with the -key:

- Energy and water economy function
 - Wellness shower program
- Automatic water volume control
 - Child lock

2nd display
The bottom section of the display contains:

- Flow rate (l/min),
- Energy (kWh),
- Water volume (m³)
- Time

Always within range

Perfect technology:

- Simple, quick unit replacement
- Can also replace all other makes with no problems
- No drilling and no dirt thanks to the patented universal installation bar
- Up to 60% energy savings when combined with a solar system
- Can be installed on the walls
- Can also be installed in areas where splashing is possible (protection class IP 25)
- Extremely durable bare wire heating system with copper casing, suitable for soft and hard water

The unit casing and control panel can be turned, which means that the DHE..SL is also perfect for low level installation

Can be installed anywhere

The convenience of the new DHE..SL can be enjoyed even in the smallest of rooms because the unit casing and control panel can be simply be turned through 180° to remain perfectly within reach even if the unit is installed at low level. Thanks to the splash protection the shower star can even be installed in a shower cubicle - and the optional radio or cable remote controls means that it can be controlled from anywhere in the house.
